https://www.linkedin.com/in/japjot-singh-bhatia/

## EDUCATION

**2023-2027**
**LOVELY PROFESSIONAL UNIVERSITY**

- B.Tech.Computer Science(Specialization in AI and Data Engineering)
- CGPA:7.65

**2021-2023**
**JANKIDEVI PUBLIC SCHOOL**

- Higher Seconday Education

## SKILLS

- Python, Java
- Numpy, Pandas, Matplotlib, Seaborn, Tkinter, Flask
- Web Development
- MySQL
- Wordpress
- Leadership
- Team and Time Management

## LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Punjabi (Fluent)

## PROFILE

As an aspiring AI and Data Engineer, I am skilled in Python, Java, MySQL, and data analysis tools like Numpy, Pandas, Matplotlib, and Seaborn. I also have web development experience with JavaScript, CSS, HTML, and WordPress. I am a quick thinker, creative, and empathetic problem-solver. My friendly and adaptable nature makes me a strong collaborator, and I excel in leadership, team management, and time management. I am passionate about leveraging technology to solve complex problems and eager to contribute to Google's mission of organizing the world's information.

## PROJECTS

**Custom Gmail Scheduler** JULY 2024
Using Google Apps Script

- Advanced Scheduling: Custom date, time, and recurring options for sending emails.
- Enhanced Control: Status updates, easy stop features, and flexible frequency settings.
- Upcoming Features: Google Drive integration, email tracking, and customizable formats from drafts.

**Water Solubility Prediction Project** July 2024
Using Delaney (ESOL) Dataset

- Objective: Predict log solubility (logS) in mols per liter.
- Data Split: 80% training, 20% testing.
- Models: Linear Regression, Random Forest Regression.
- Gained experience in data preprocessing, model training, and evaluation using metrics like MAE, MSE, and $R^2$. Check out the project on GitHub.

**Exploratory Data Analysis Project:** JULY 2024
Done on Loan Dataset

- Techniques: Multivariate, Bivariate, Univariate analyses; null value checks; outlier detection with IQR.
- Tools: Python and Pandas for data integrity and refinement.
- Check out our project on GitHub.

## COMPETITIONS

**Code-A-Haunt Web Dev Hackathon** FEBRUARY 2024

- Project: A niche fitness website transforming data into captivating visualizations, fostering a vibrant community.
- Team Synergy: Unique skills and perspectives led to a seamless ideation and execution process.
- Achievement: Reached the final round, showcasing our hard work and ingenuity
